

In the Claims:

Please cancel claims 2-20 without prejudice.

1. (Original) A method for activating a mobile station in a wireless communications network comprising the steps of:
 - receiving at a network node a registration message including information translatable into an address for an over the air activation processor;
 - translating said information into said address;
 - routing said registration message to said over the air processor;
 - initiating an activation process at said over the air activation processor in response to said received registration message; and
 - transmitting activation parameters to said mobile station in response to said activation process.

2-20. (Canceled)
